Olga Valova is an experimental artist, from the traditional oil&canvas painting to the coal sketches, acrylic ballons, stencils and much more are working here.

”

I like that nobody can limit you in art – the artists make the borders by themselves. Painting taught me to talk to myself and to hear people around – but it kind of new-universe-language.

Olga Valova is a founder of the style **mult-art** – it's an abstract painting and a naive art on canvas – a storm of colors and always a history inside.

Artvalova means a lot of bright colors and emotions, many Olga's arts are similar to the nature of the artist.

”

Life is a gift, we have to celebrate it every day!
